## *Specifications*

# ECOVAM™ VAM ENDO ECTO GRANULAR

### Part 1: Product Description

The Endo & Ecto Mycorrhizal in this product in effect greatly expands the surface area of roots, significantly increasing the ability of the plant to use water and nutrients and become more adapted to “real world” conditions. Mycorrhizal roots protect the plant from predators and establishes conditions for strong, healthy, “naturalized” plants. Use EcoVam™ Endo Ecto Granular drip tape, hydroponic feeding and liquid root injection that put the product into direct physical contact with roots of plants.

### Part 2: Product Specification

<b>Endomycorrhizal Fungi</b>	90,780 spores per pound, 200 spores per gram 7 Species Endomycorrhizae : Glomus mosseae, Glomus intraradices, Glomus claroideum, Glomus etunicatum, Glomus clarum, Glomus deserticola, and Glomus microaggregatum.
<b>Ectomycorrhizal Fungi</b>	220,264 spores per gram to include: Pisolithus tinctorius (199,427) and Rhizopogon (20,837).

### Part 3: Application

**Soil Drench:** Mix with water at a minimum rate of 1 oz/gal (7.5 g/L). Mix well and keep agitated. Spray plant roots or dip roots prior to transplant, or water in as a soil drench (for porous soils only). 1 gal of suspension treats roughly 58 1-gal potted plants.

**Restoration:** Use 8 to 12 lb/a (9 to 13.5 kg/ha) for broadcast or hydromulch operations before or during the seeding operation.

**Nurseries and Greenhouses:** Inoculum can be incorporated into growing media at a rate of 0.6 lb/yd<sup>3</sup> (0.36 kg/m<sup>3</sup>) for pots and containers. Plug and liner trays used for propagation will require a rate of 1.23 lb/yd<sup>3</sup> (0.73 kg/m<sup>3</sup>). A higher rate is required to ensure that the propagules are present uniformly in all small cells or cavities.

**Turf:** Apply during installation or aeration. Use a rate of 0.82 to 2 oz/1,000 -2 (251.5 to 608 g/1,000 m<sup>2</sup>).

**Seed Coat:** Use 0.86 to 1.23 lb/a (0.96 to 1.38 kg/ha) of seed.

**Landscape Planting:** Touch damp roots to the inoculum so a small amount sticks to the roots, or sprinkle into planting holes. **Potted plants:** 0.22 oz/plant (6.15 g/plant). **Trees:** 0.65 oz/in (7.28 g/cm) of stem caliper.
