

POTTING AND SOIL AMENDMENT

ECOVAM™ VAM ENDO 10X

“Inoculum Non Plant Ingredients”

The endomycorrhizae in this product in effect greatly expands the surface area of roots, significantly increasing the ability of the plant to use water and nutrients and become more adapted to “real world” conditions. Mycorrhizal roots protect the plant from predators and establishes conditions for strong, healthy, “naturalized” plants. Use EcoVam™ Endo 10X in drip tape, hydroponic feeding and liquid root injection that put the product into direct physical contact with roots of plants.
